

ESMO World Congress on Gastrointestinal Cancer 2021 Industry Satellite Symposium

HER Driven CRC and Gastric Cancer: Digesting the Evolving ADC Landscape

Thursday, 1 July 2021, 12:05 CET

Objectives

- To review the current treatment landscape and unmet treatment needs for advanced CRC and gastric cancer
- To assess current methods for molecular profiling of HER2 and HER3 and evaluate the need for continued testing
- To discuss the emerging ADC targets to treat CRC and gastric cancer
- To examine current ADCs in development for patients with CRC and gastric cancer

Eric Van Cutsem, MD, PhD

University Hospital Gasthuisberg
Leuven, Belgium

Salvatore Siena, MD

Niguarda Cancer Center
Milan, Italy

Yelena Y. Janjigian, MD

Memorial Sloan Kettering Cancer
Center
New York, New York

Agenda

12:05-12:20 CET	Introduction: Disease Landscape Overview	Eric Van Cutsem, MD, PhD
12:20-12:35 CET	Targets and Clinical Data in CRC	Salvatore Siena, MD
12:35-12:50 CET	Targets and Clinical Data in Gastric Cancer	Yelena Y. Janjigian, MD
12:50-1:05 CET	Live Question and Answer Session	Faculty Panel

Industry-led lectures will be conducted in conjunction with this event and may discuss agents and products in development. The above industry-led program is not a part of ESMO World GI Congress. It is not organized or endorsed by Imedex.

This symposium is intended for HCPs. This satellite symposium is organised and funded by Daiichi-Sankyo.
